

QUICK CHANGE ALUMINUM CALIPER UPGRADE KITS FOR 1988 - 99 GM 1/2 TON TRUCKS

Upgrade the stock single piston caliper on your 1988-99 GM truck with our Quick Change Aluminum Caliper Upgrade Kit - all while maintaining your stock wheels!

The kit includes Force 10® SuperTwin TK 2-piston aluminum calipers with two 54mm stainless pistons and high performance pads. It is a direct bolt-on replacement to the stock single piston calipers that came on 1988-99 1/2 ton 2WD & 4WD GM trucks. Kits are also available for 1992-00 GM 1/2 ton 2WD & 4WD SUVs.

Simply unbolt the heavy cast iron stock caliper and put the new lightweight aircraft quality aluminum one in its place. The Force 10 SuperTwin TK calipers are about half the weight of the stock cast iron ones, resulting in a reduction of unsprung weight from the front of your truck, greatly improving ride quality.

Features:

- 2 piston design provides more consistent pressure on the brake pad than the stock single piston caliper
- More consistent pad pressure reduces pad deflection, thus increasing clamping pressure on the rotor and reducing braking distance
- Corrosion-free lightweight stainless steel pistons minimize heat transfer to the brake fluid for optimum performance
- Calipers come standard with a clear anodized finish (optional powder coating available)
- Add a set of new Turbo slotted and Xtra Life plated rotors for a complete performance look

Force 10 SuperTwin TK 2-Piston Aluminum Caliper (shown with optional powder coating).
